DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-4, 6-9 and 12-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugioka et al. or Kugure et al., each independently in combination with Matsumura et al., for reasons cited in the actions.

Response to Arguments

3. Applicant's arguments filed 10/29/2007 have been fully considered but they are not persuasive.
4. Regarding the fillers of Sugioka et al., as previously stated, these fillers, such a glass filler and talc, would also serve as (non-halogen) flame-retardants in the resin composition. While applicant disputes this, applicant's attention is direct to US patent 5,309,539 (col. 2, lines 57-59) and US Patent 3,720,643 (abstract), both of which clearly demonstrate the utility of these same fillers as fire-retardant components in fire retardant polymer compositions.

Thus, the fillers are not excluded from the claimed composition. At the very least, the filler would serve as inert compounds in the composition, and not negative the "essential" characteristic of the composition.

5. Regarding claims 25 and 26, it is noted that styrene is the primary monomer component in the hydrogenated copolymers recited in Sugioka et al., i.e. at least 50%.

6. Regarding Kogure et al. and the amount of the polyphenylene ether used, one of ordinary skill in the art would have found it *prima facie* obvious to determine a workable or even optimum range of polyphenylene ether content for composition. "[D]iscovery of an optimum value of a result effective variable in a known process is ordinarily within the skill of the art." In re Boesch, 617 F.2d 272, 276, 205 USPQ 215, 219 (CCPA 1980); "[W]here the general conditions of a claim are disclosed in the art, it is not inventive to discover the optimum or workable ranges by routine experimentation. In re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

7. Applicant is reminded that one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
